## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3, 8-10, and 18-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Baba et al. (2003/0050039).

Regarding claims 1, 8, and 18, Baba discloses an emergency report cellular phone, cellular connection switching method and GPS positing method, comprising the steps of: receiving at least one DTMF tone over a communications channel at the wireless communications device (see fig.3, elements 11, 20 and its description); and controlling, in response to the at least one DTMF tone command, an operating characteristic of the wireless communications device (see fig.6 and its description).

3. Claims 1, 8, and 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Huh et al. (6,791,976).

Regarding claims 1, 8, and 18, Huh et al. discloses mobile to mobile DFMTF signaling in tandem free operation, comprising the steps of: receiving at least one DTMF tone over a communications channel at the wireless communications device (see abstract, fig.1, elements MS B, fig.3, and its description); and controlling, in response to

Art Unit: 2683

the at least one DTMF tone command, an operating characteristic of the wireless communications device (see fig.3 and its description).

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2-7, 9-17, and 19-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Baba et al. (2003/0050039).

Regarding claims 2-7, 9-17, and 19-24 since, Baba use DTMF to control the siren speaker of mobile device (see fig.3, elements 16, 20). Thus, it would have been obvious to one having ordinary skill in the art at the time the invention was made to use the DTMF command message to control the features described in claimed in order to improve the use of telecommunication devices.
